

1. Resistors 5% 0.1W unless otherwise noted.
2. Capacitors X7R 50V unless otherwise noted.
3. U2 can be replaced with another auto-zero single-supply op-amp, taking into account its speed, power consumption, and offset voltage. E.g. TLV333, ISL28133, TS2121, COS1333-A, COS8551-A.
